REGION 8 BULLETIN NO: FY-12-14

Subject: Environmental Management System Training

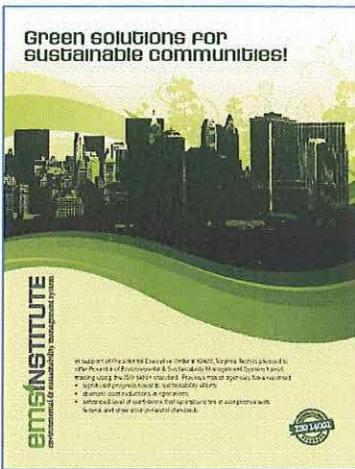

Program Area: Environmental Management

Date: 11/26/2012

Dear Grantees:

The Federal Transit Administration is currently accepting applications for –

Environmental Management Systems Training & Technical Assistance Program for Transit Agencies

- [FTA's Dear Colleague](#), which invites application submissions, is posted at: <http://www.fta.dot.gov/EMS>
- [Applications](#) are due December 21, 2012
- 4 Workshops are held in Roanoke, VA

What is an EMS?

An environmental management system (EMS) is a set of management processes and procedures that allow an organization to analyze, control and reduce the environmental impact of its activities, products and services and operate with greater efficiency and control. FTA's program walks your agency through the development and implementation of an EMS using the ISO 14001 Standard through a series of workshops, on-site technical support visits, electronic materials and resources, and consultation.

Go to www.fta.dot.gov/EMS for:

- Application instructions
- List of past participants
- Final reports from previous offerings

Please contact Mr. David Beckhouse, Planning and Program Development Team Lead, at 720-963-3300 if you have questions.

Sincerely,

Linda M. Gehrke
Regional Administrator
